

Default Tax Exposure vs. Available Rollover Relief

How each class of Broxmen's operational assets is taxed on transfer, and the election available to defer that exposure

ASSET CLASSIFICATION	DEFAULT TAX TREATMENT WITHOUT ELECTION	TAX-NEUTRAL ROLLOVER RELIEF MECHANISM
Immovable Property & Shares Specified assets	20% Capital Gains Tax (CGT Cap 23:01) 20% Special CGT on Land-Holding Entities (Sec 30C)	JOINT SECTION 15(1) CGT ROLLOVER ELECTION Transfers assets at original tax base cost
Movable Plant, Equipment & Vehicles	- Corporate tax recoupment at 25.75% 15.5% Value Added Tax (VAT) on asset supply	FOURTH SCHEDULE (PARA 7) INCOME TAX ELECTION Transfers movable assets at Tax Written Down Value
Uncompensated Asset Extraction	15% Deemed Dividend / NRST on asset value extracted from Broxmen	CONSIDERATION MUST BE SETTLED Via SPV Zim equity share issuance, or a documented intra-group loan account

Note — the rollover mechanisms above are elections, not automatic reliefs: each requires the parties to make a joint election (or, for the third row, to actually structure consideration as shown) at the time of transfer. Absent the election, the default treatment in the middle column applies in full.
