

Investor Capital Injection — Tax-Neutral Route

Investor Cash Injection → SPV Zim (new share issue) → Broxmen

Why this route is recommended — routing new investor capital through a fresh share subscription in SPV Zim, rather than a direct cash payment or loan to Broxmen, keeps the inflow a capital receipt rather than income: no Income Tax, no CGT, and no withholding tax exposure of the kind that arises on a deemed dividend or an uncompensated extraction (see the Asset Transfer

Tax Treatment table). Par value plus share premium should be documented and lodged with the Registrar of Companies to evidence the capital nature of the receipt.
